

The inner layer of keyfob RFID blocker is made of special nano conductive materials, the inside seal space forms a "Faraday Cage", primarily used to prevent the signal relay hack (blocks thieves from copying or boosting your wireless keyfob code to enter your vehicle). The outer layer is made of high grade PU leather which can reduce radiation from electronic devices.

The PU leather surface provides a waterproof protection and easy to clean, designed with a keychain which makes it easy to carry. This car key fob protector with fine tailoring, exquisite edge cover stitching and edge pressing, fashionable and more durable.
