

Our company provides dry inlay, wet inlay, and different kinds of sizes paper adhesive labels.

We own the HF/UHF antenna design technology, full set of automatic label production line, and we can design UHF antenna for our customers if paid, and use paper/PET/PVC/ABS/adhesive to make roll RFID tags or single RFID tags According to customer requirements.

Adhesive paper tag has back gum (making of wet inlay), paper RFID tag doesn't have back gum (making of dry inlay).
