

# 13.56MHz RFID card with gold hot stamping

## 1.Specification of 13.56MHz RFID card with gold hot stamping.

Chip Type: NXP Ntag213, Mifare S50, NXP Ultralight, NXP Ultralight C, Broadcom Topaz 512 etc.

Technology: ISO 14443A protocol.

Frequency/Protocol: 13.56mhz/HF.

Reading distance: 3-10cm depend on reader power and using environment.

## 2.Profile

Material: PVC/PET/Paper.

Surface: glossy, matte, frosted.

Size: 85.5\*54\*0.84mm or as requested.

## 3.Working Environment

Working life: 5-10 years and depend on using environment.

Store temperature: -25 °C-50 °C

Humidity: 20%-90%RH

Working temperature: -40 °C-65 °C

## 4.Craft

-preprinting: CMYK full color & silk screen

-signature panel

-magnetic stripe: 3000E,2750E,4000E

-barcode: Code39,Code128,Ean8,Ean13,etc.

-numbering: inkjet,thermal printing,laser printing.

-encoding

## 5.Application of RFID card

Patrolling system, IC card attendance system, entrance guard system, enterprise system, intelligent transportation, and other areas of the radio frequency identification.

## 6.Package and Delivery

Package of RFID card: (For standard size, 200 pcs/inner box of 22.5\*9.3\*6cm), 10 boxes/carton, 14 kg/carton.

Delivery date: 5-7 working days for 10K after order confirmation.

Shipping way: by express(DHL,FEDEX), by air, by sea.

Price term: EXW,FOB,CIF,CNF

Pay term: payment by TT,western union,paypal,etc.

Monthly capacity: 6,000,000 pcs/month

Certificate: ISO9001-2008,SGS,ROHS,EN71.

### What is RFID?

Radio frequency identification (RFID) is a wireless data collection technology that uses electronic tags that contain an integrated circuit chip to store data. It is a method of identifying objects and of transferring information about the objects' status via radio frequency waves to a host system. In the case of passive RFID, the tags contain no power source of their own, such as a battery. The tags are energized by the reader device's transmitted RF energy, then use that harvested RF energy to transmit return signals, which the reader device can interpret.

RFID card can be encoded and read contactlessly via wireless technology. RFID card which is also known as transponder card, provide you with high level data security and allow you to integrate several possible applications into just one plastic card.

**Shenzhen Chuang Xin Jia Smart Card Co.,Ltd** is a professional passive RFID card/NFC card manufacturer in China, which has over 15 years. Our main products include RFID tag/NFC tags, RFID/NFC card, RFID ID card, RFID wristband, NFC stickers, NFC readers, etc. Our big clients include Sony, Samsung, OPPO, British Telecom.

For more information about RFID card, please kindly visit our website <http://www.nfctagfactory.com/> or send me inquiry directly.
