

Mifare Ultralight card is a non-contact thin IC card. Ultralight chip can be pressed in thinner cards. As for the cost, Ultralight also is more suitable for short-distance multi-site traffic system. If you have any need for Mifare Ultralight card. Contact me for more details .

Technical Parameters:

Product name:	MIFARE ultralight card
Chip:	MIFARE Ultralight® EV1, MIFARE Ultralight® C
Storage:	512 bits
Frequency:	13.56 MHZ
Protocol:	ISO 14443A
Read and write distance:	5 CM
Read and write time:	1-2 ms
Operating temperature:	-20°C-55°C
Reading times:	>100000
Data storage:	>5 years
Size:	85.5×54×0.84 mm
Material:	PVC, etc
Application:	Subway tickets, urban transport cards, intelligent building access systems, etc.
