

Product Description:

Mirror effect is a way to add a highly reflective and polished look to our metal cards. This mirror effect is only available on our stainless steel, gold, rose gold, and premium metal cards and results in the un-etched metal having a mirror-like appearance. Etching on mirror finishing usually creates a matte appearance which provides a beautiful contrast to the mirrored look. A great way to repurpose this finishing is to create a design with reversed text. Designing this way will result in a matte background to be combined with mirrored, glamorous text. Overall, mirror finishing is an elegant addition to our metal cards.

Profits of Mirror Effect Metal Business Cards:

1. Make you and your aggregation angle out to your affairs and barter from the start
2. Will not be easily lost by your affairs and customers(like approved business card)
3. Are visually and physically impressive
4. Can be dual sided at little to no extra cost.
