

Product Description

Scratch-off card is a normal card with coating covering the number and letter passwords, so we also can call them code covering card, account card.

Scratch-off card is a special presswork, manufacturers print the awards area and cover them with coating, when people scratch off this coating then can show awards area. Scratch off cards are widely used in market because they can be used simply and make a good impress for consumers.

Scratch-off card has good prospect with technology developing and variety of types. Now widely use in market has lottery card, rechargeable card, password card, consumer brochure and point card, etc.

For raw material of scratch off panel card we can use coated paper, ivory board paper, adhesive sticker, PVC etc. And coated paper with glossy surface and better for printing, that is why we use coated paper for this card many, of course ivory paper we also use but this paper front-side will highlight spot and just can print simple content backside and use rarely.
