

Oval Head RFID Silicone Wristband Description:

Silicone wristband from China used time molding of 100% silicone, with non-toxic and tasteless, good elasticity, non-cracking, long lifetime, does not irritate the skin and so on. Soft silicone material, elegant design, simple, bright colors, fashionable and loved by the young friends, and gradually developed into a popular jewelry. Wearing a more avant-garde and popular color silicone wristbands, make you cool flavor! Worn on the hand, it is essential to the fashionable.

Silicone RFID wristbands are implanted RFID chip in the wristband. They are applied for access control, query, tracking and other fields. Since silicone wristbands have a good waterproof effect, and are a closed loop design, they are very convenient to carry, so in many baths, swimming pools, spas use the product as a key for customer storage closet, customers can wear silicone wristbands on wrist, enjoy playing in the water.

We are specialized in all kinds of RFID wristbands products and are service provider of production and sale. We based on RFID technology provide RFID wristbands with all kinds of styles, which covers the world's major semiconductor application chip companies such as: NXP founded by Philips, EM, TI, ST, IMPINJ, ATMEL, France INSIDE, Britain JEWEL, as well as domestic Fudan Microelectronics, and so on. We have a professional large-scale factory, and accumulated years of professional experience in production, we can give sample production or personalized services according to customer needs.
