

RFID bullet tag is specially designed for automatic equipment management. It is made of heat-resistant and oil-resistant material. It has built-in RFID chip and can be applied to various industrial environments and equipment asset management industries. It facilitates product tracking, quality management, and optimize enterprise production and system management.

Widely used to install in the items which need to hide or place in small size items, such as: household and vehicle smart key handle, plugs and sockets of the computer or communications, smart MP3-USB products, application or important documents smart dongle; re-package of animal identification; trademark micro-sticker, also applies to firearms, helmets, bottle, cosmetics, electric toothbrush, mold, jewelry, bargaining chip and others as RFID smart identification.

Product Specification:

Material	ABS
Size	15.5×4.5mm
Chip	TK4100 or customized
Frequency	125KHz/13.56MHz
Work temperature	-20~70℃
Storage temperature	-30~80℃
Working distance	50~80mm(Depend on the antenna and power of the RFID reader)
Color	Black(can custom color when bulk order)
Weight	5g
Packaging Details	100 pieces/bag
Lead Time	7-8 working days
