

Vertical Aluminum Foil Credit Card Holder Description:

Our RFID Blocking Card Protector Sleeves are manufactured from top quality protective paper aluminum foil material that is heat-resistant and water proof, along with resistant to minor shredding and punctures. It looks like an ordinary paper, but it is waterproof, tear proof, can be used multiple times. As soon as your card is put securely inside of the sleeve, a shield is placed around it that blocks electromagnetic reader signals from associated with the RFID chips found in your card. This particular basically makes all of your private information inaccessible. Your cards will remain protected before you remove them from the sleeve. This is so simple. The credit card holder with rfid protection is thin, lightweight and made to match all standard passport and credit card sizes. They match easily inside any wallet, purse, handbag, or even layer wallet. There is a slight U-shaped marking in the center of the open end that enables you to remove your cards or passport easily. Providing you heightened protection that is far more cost effective, discreet, and fashionable compared with RFID wallets and bulky cases that are often a headache to carry around.

[RFID blocking sleeve](#) is designed to help preventing identity theft. These sleeves at first glance look like a simple piece of cardboard. You have to take a further look into these sleeves although to see that they are truly a work of art. The outside of the sleeve is a paper coating, no biggie there other then you can get it in several various designs. For the inside, if you spread it open like an envelope you can see the aluminum lining that is designed to stop theft. Next the card holder suits your cards tightly therefore they do not slip around or fall out easy. Being so tight fitting makes it where the sleeve with the card in it easily fit in the slots of your wallet with no issue.
