

Product Description of cheap paper nfc tag sticker

Material: Paper, PET, PVC, etc.

Size: 35*35mm or to be customized.

Thickness: 0.4-0.5mm or 0.8-1mm, or customized.

Frequency: HF:13.56Mhz.

Protocol: HF:ISO14443A.

Available Chip: NXP Ntag213, Mifare S50, NXP Ultralight, NXP Ultralight C, Broadcom Topaz 512 etc.

EPPROM: 64 bytes, 192 bytes, 144 bytes, 512 bytes, 1k bytes etc. Different chips of different EPPROM.

Reading distance: LF/HF:3-10cm.

Crafts available: Printing, serial number, barcode, and so on.

Application of NFC Tag/NFC Sticker/NFC Label:

NFC mobile payment, NFC electronic intelligence posters, Electronic ticket, production identification, NFC electronic sign in, Mobile name cards, library management, entrance access, or expense, and so on.

Monthly capacity: 6,000,000 pcs/month.

MOQ of NFC Tag/NFC Sticker/NFC Label: 500 pcs.

Free samples are available upon request.

Certificate: ISO9001-2008,SGS,ROHS,EN71.

Packing of NFC Tag/NFC Sticker/NFC Label: In roll or in single pieces, upon clients' request.

Single Piece Package: 100 pcs/Bag, 10 Bags/Box, 20 Boxes/Carton.

Roll Package: 2000 pcs/Roll, 3000 pcs/Roll, 5000 pcs/Roll, 1-3kg/1000pcs or on your demand.

Delivery date: 6-7 working days for 10K after order confirmation.

Shipping way: by express(DHL,FEDEX), by air, by sea.

Price term: EXW,FOB,CIF,CNF etc.

Payment term: pay by TT,western union,paypal,etc.

To be continued...

Near Field Communication (NFC) is a set of standards for smartphones and similar devices to establish radio communication with each other by touching them together or bringing them into close proximity, usually no more than a few centimeters. Present and anticipated applications include contactless transactions, data exchange, and simplified setup of more complex communications such as Wifi communication. It is also possible between an NFC device and an un-powered NFC chip, called a "tag".

An **NFC tag** is a small passive (no battery) device which contains a tiny microchip attached to a small loop antenna. When the tag is scanned by an NFC reader such as a mobile phone, it powers up and wirelessly transfers information such as a web address, text or a command for an App. The NFC tag can be locked so that the data on the tag cannot be changed or left unlocked so the data can be changed again and again. NFC tags are typically printed stickers or plain stickers, but they can be also enclosed in NFC products such as keyfobs, wristbands, hang tags and many other items.

Most of mobile phones have NFC application and make today's life will be more smart and easy. We can use NFC function to payment, identify, data exchange, information share. NFC sticker can affix on phone backside or anywhere if you want. Customer can rewrite urls, text, number into nfc sticker which embedded nfc chip inside. Generally they are 13.56mhz and iso 14443 protocol. We can chose them depend on their user memory.
