Disposable Tamper Proof Anti-Theft NFC Tag Features:

Tamper proof RFID tags have been specially designed so that any attempt to remove them will destroy the antenna and stop the tag working. Disposable RFID tags are designed to prevent tags being moved between objects and locations. RFID anti-counterfeit labels are widely used in alcohol, cosmetics, pharmaceuticals, tea, high-end nutritional products, luxury goods, automotive glass to achieve anti-counterfeiting and tear-proof and identification functions.
