

FPC mini nfc sticker can be used for small size products, such as RFID wristband, NFC rings, toys electronic tags, cameras, drugs and other security labels.

Advantage of fpc mini nfc sticker:

1. Antenna process: the traditional etching aluminum antenna due to its material properties, can not make smaller antenna, compared to the copper material properties, copper is more stable, corrosion-resistant, you can create a more stable frequency, smaller size of the antenna.
2. Bonding process: The stability of the COB process is validated over a long period of time. Can be used in different harsh environments, to meet the late different forms of packaging types.

Basic info:

Available Chip	NXP mifare ultralight ev1, NXP NTAG 213/215/216
Frequency	13.65Mhz
Protocol:	ISO 14443 A
Size:	5*5mm, round 9mm, etc, very small size
Material	pet
Reading times	100,000 times
Retention:	10 years
Antenna	etching copper
Date format	according to the nfc
Reading distance	1-2CM (depending on antenna geometry and reader)
Encoding	url, text, personal info, serial numbers, etc
Package	neutral package in piece
Application	mainly embedded into some products
Company brand	cxj

Our Company And Factory

Company Introduction

Office

3,000 m² office, 250+ professional sales service you!

Shenzhen Great Creativity Smart Card Co., Ltd.

Factory

12,000m² clean work shop, more than 500 staffs, strict QC system, full set of advanced machines for all kinds of crafts production, ensuring each order will be taken cared fast and well.
