

Features of RFID Signal Blocking Bag:

Car key blocker pouch keep your car's security system from getting hacked. Protects your personal and financial data by blocking RFID scanners & readers from detecting your cards' RFID signals. Don't get hacked! Hackers work hard to steal these things - protect yourself! This car key faraday cage is a must for the modern lifestyle.

Inner silver layer blocks signals, outer on all sides with dual paired seam construction. Shields keyfobs, WiFi cards, thumbdrives, and other small devices from all wireless signals.
