

## RFID Blocking Box to Protect Car Key:

---

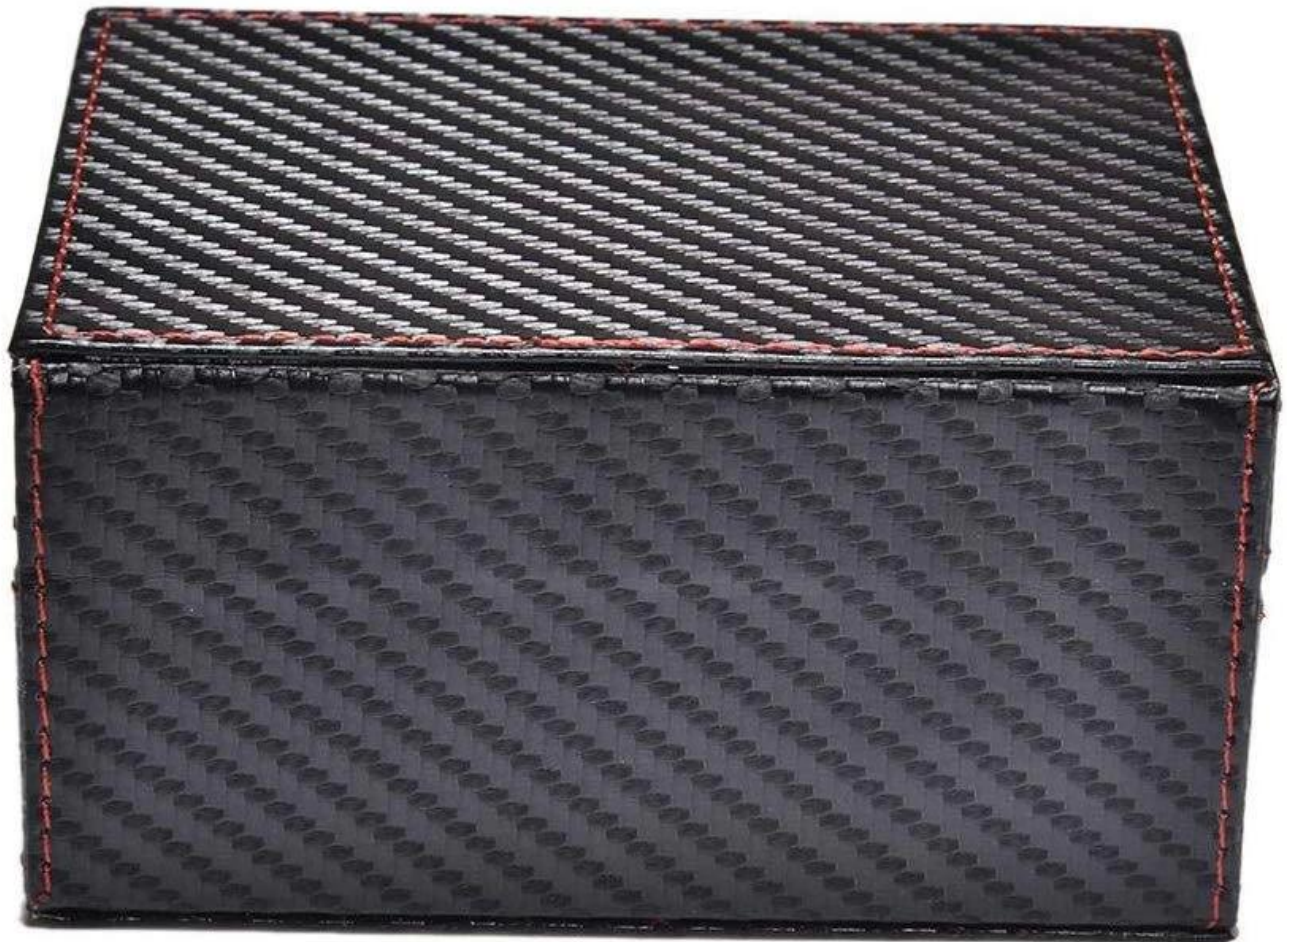

The RFID Blocking Box provides an additional layer of security for your vehicle by preventing unauthorized access. It effectively blocks the signal from your key fob, making it nearly impossible for thieves to use signal amplification techniques to unlock and steal your car.

One of the most common methods used by car thieves is the relay attack, where they capture the signal from your key fob and use it to gain entry to your vehicle. The RFID Blocking Box ensures that your key fob's signal is shielded, thus preventing such attacks.

Compared to other advanced security systems, the RFID Blocking Box is a cost-effective solution that offers significant protection against car theft. It is an affordable way to enhance the security of your vehicle without breaking the bank.

Using the RFID Blocking Box is straightforward. Simply place your car keys inside the box when they are not in use, and you instantly have an added layer of security. There are no complicated setups or installations required.

*Fit for 5-7 pcs keys*

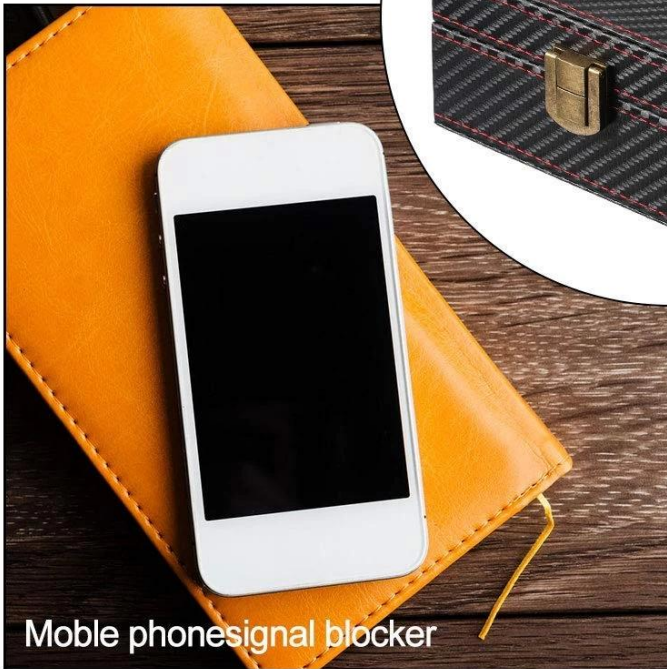

**High Density Faraday Fabric**

**Anti-friction Leather**

**Strong Metal Buckle**

Car key signal blocker

Mobile phone signal blocker

## Application for

Credit card no degauss
