RFID Promixity Card Features:

RFID Promixity Card are smart cards with a frequency of 125 KHz. 125khz RFID cards have a read range of approximately 7-8 CM. Mainly used in access control, student cards, animal tracking, etc.

Radio waves transmit information between the contactless smart card and the card reader to complete read and write operations.Contactless smart cards have similar applications like contact smart cards but the transactions in between card and reader are very fast and convenient.

Use Our Contactless Smart Cards in Applications Like:

1. Micro-payment card
2. Physical and logical access control
3. Government and corporate identity cards
4. Automatic fare collection.
5. E-Passport
