

This RFID coin tag is commonly used in the warehouse or anywhere asset tracking is required. It is laminated within PVC to withstand harsh environments. A variety of sizes and Inkjet printing of ID are available, it is transparent, waterproof and heat resisting.

The RFID plate is an automatic identification tableware that is embedded in the RFID chip at the bottom of the plate. The RFID plate is the core component of the smart disk and self-selected restaurant fast settlement system. It is suitable for college canteens and enterprises canteens and Chinese fast food chains, self-service hot pot restaurants, etc.
