### Company Information

Shenzhen Chuang Xin Jia Smart Card Co.,Ltd is a professional passive RFID tag/NFC tag manufacturer in China, which has over 15 years. Our main products include RFID tag/NFC tags, RFID/NFC card, RFID ID card, RFID wristband, NFC stickers, Plastic card, Metal card, etc. Our big clients include Sony, Samsung, OPPO, British Telecom etc.

An NFC tag is a small passive (no battery) device which contains a tiny microchip attached to a small loop antenna. When the tag is scanned by an NFC reader such as a mobile phone, it powers up and wirelessly transfers information such as a web address, text or a command for an App. The NFC tag can be locked so that the data on the tag cannot be changed or left unlocked so the data can be changed again and again.

NFC tags are typically printed stickers or plain stickers, but they can be also enclosed in NFC products such as keyfobs, wristbands, hang tags and many other items.

If you have an NFC enabled mobile phone then you can use NFC. It's as simple as that. There's also a fantastic and growing range of Apps and NFC software available whatever your project - whether that's setting up a tag for home use to turn on your WiFi or a large scale asset tracking rollout.
